SUMMARY

QA Engineer / Technical QA professional with 7 years of game QA experience across Blizzard Entertainment and Intrepid Studios. Experienced in live-service validation, data quality, economy and systems testing, milestone support, bug triage, release-readiness risk communication, Unreal Engine workflows, player feedback analysis, and cross-functional QA coordination. Portfolio projects add supporting evidence of structured reporting, validation discipline, documentation habits, Python, pytest, and GitHub practice.

CORE STRENGTHS

Game QA	Technical QA	Test Planning	Bug Triage	Release Readiness	Build Health	External / Vendor QA Coordination	Jira	Confluence
Unreal Engine 5 Editor	SQL	Data Quality	Backend / API Testing	Grey Box Testing	Black Box Testing	White Box Testing	Risk Assessment	
Bug Repro Standards	Player Feedback Analysis	Cross-Discipline Collaboration						

EXPERIENCE

QA Engineer II - Ashes of Creation, Economy / Narrative

Intrepid Studios | Remote | 2024-2026

- Supported QA across economy, crafting, progression, rewards, events, data validation, and player-facing MMO systems.
- Built and maintained test plans, test suites, and Confluence documentation for economy and data validation workflows.
- Analyzed player feedback and bug reports to identify trends, critical issues, and player-impact risks.
- Supported bug escalation workflows and helped surface priority issues in Jira.
- Organized and supported playtests to gather actionable player insights and improve coverage.
- Tested in Unreal Engine 5 Editor to support gameplay, systems, and validation workflows.
- Improved developer collaboration through clearer bug reports, triage habits, and QA communication.

Test Analyst, Data - Diablo Immortal

Blizzard Entertainment | Irvine, CA | 2021-2024

- Led data quality validation focused on accuracy, consistency, reliability, and player-facing impact.
- Designed data quality assessments to improve confidence in live-service systems.
- Used SQL to extract, analyze, and investigate data issues.
- Partnered with data engineering, product, and BI teams to resolve quality issues and root-cause discrepancies.
- Supported testing for data pipelines and ETL workflows to improve reliability and compliance.
- Used GCP tools, including BigQuery and Dataflow, to support data workflow validation and investigation.

Test Analyst, Contract

Blizzard Entertainment | Irvine, CA | 2019-2021

- Supported QA coverage across multiple Blizzard titles through Team Burst / Strike Team Foundation work.
- Contributed to broad testing strategies across gameplay, content, telemetry, and live-service quality efforts.
- Helped develop early data-focused QA practices and transitioned into telemetry test planning and validation.
- Built core habits around clear repro steps, disciplined bug writing, cross-team communication, and release-pressure support.

SELECTED GAME WORK

Warcraft III: Reforged | StarCraft: Cartooned - StarCraft: Remastered graphics overhaul |
Hearthstone expansions | Diablo II Switch port | Diablo II: Resurrected | Diablo Immortal |
Overwatch 2 | World of Warcraft: Shadowlands | World of Warcraft: Dragonflight | Diablo IV |
Warcraft Rumble | World of Warcraft: The War Within | Diablo IV: Vessel of Hatred | Ashes of
Creation

SUPPORTING PORTFOLIO / QA TOOLING

QA Bug Report Tool

First working Python CLI that converts rough QA notes into structured bug reports with severity, priority, repro steps, expected vs. actual behavior, repro rate, evidence fields, and notes. Includes pytest coverage, sample data, generated reports, and validation checks.

Community Pulse Report Tool

First working Python prototype that turns fictional community feedback exports into sentiment summaries, repeated themes, representative quotes, and follow-up notes.

Nyx

WIP cozy cosmic fishing prototype documented through scoped implementation notes, QA-style validation planning, save/load reliability notes, and Unreal workflow practice.
